New specifications feature interlaced reinforcement ribs, making it ideal for use on surfaces like garden soil or sandy areas that haven't been hardened. These ribs dig into the ground, adapting to various surface types to prevent slipping.

* Currently, this design is available only for the 18074S & 18074BS.

FEATURES

- Made of high-strength, lightweight, and durable polypropylene material.
- Resistant to vibrations, noise, UV radiation, weathering, and chemicals.
- Insect-proof and designed to prevent damage from weed whackers.
- Nestable design for efficient transportation and handling.
- Textured surface to prevent equipment sliding.
- 3-inch height to protect equipment from standing water.
- Provides a stable and secure platform with evenly distributed support points to resist settling.
- Versatile with a lot of options.
